About Me

I hold a Master's degree in Computer Science, specializing in Software Systems Architecture and Distributed Environments. Passionate about programming and technological innovation, I am eager to apply my skills to impactful projects that deliver modern and effective solutions.

Education

- **Master's Degree in Computer Science** – Specialization in Software Systems and Distributed Environments (*SLED*): Thesis: *Deep Analysis and Prediction of Chikungunya Using Ensemble Regression Approach*, 2024, *Excellent* grade.
- **Master's 1 in Research Computer Science** – Specialization **SLED**, University of Ngaoundéré, 2023, *Good* grade, Top of class.
- **Bachelor's Degree in Computer Science**, University of Ngaoundéré, 2022, *Good* grade.
- **Baccalaureate in Series C**, 2019, *Good* grade.

Languages

- **French:** Fluent
- **English:** B1 Level

Technical Skills

- **Frontend Development:** ReactJS, Styled Components, Sass, TailwindCSS, NextJS, AstroJS, React Native.
- **Backend Development:** NodeJS, ExpressJS, Firebase, Drizzle ORM, PostgreSQL.
- **Libraries and Frameworks:** SDL, ImGUI, Mantine UI, Shadcn UI, Material UI.

- **Programming Languages:** C, C++, JavaScript, TypeScript, Python.
- **Tools:** Git, VSCode, CMake.
- **Deployment:** Netlify, Vercel, WebHostApp, Render.

Professional Experience

- **2024 – Present:** Professional Internship as a **Frontend Developer** at **Sygalin Sas CANAL +**, Ngaoundéré. Development of a management application for associations (AssoEase) using **React**, **TypeScript**, **Mantine UI**.
- **2019:** Training Completion Certificate in **Introduction to Maintenance and Surveillance Cameras** from **GI** (General IT), Garoua, *Good* grade.

Certifications

- **C++ – Sololearn:** [Certificate Link](#).
- **Building Blog using MERN Stack – Udemy:** [Certificate Link](#).
- **Latex – AUF:** [Certificate Link](#).
- **CITS – Cameroon International Tech Summit:** Participant in the national hackathon as a frontend developer and **Team Leader** of a **5-person** team, [Certificate Link](#).

Interests

Programming, Science, Animals, Anime, Video Games, Comics.

Projects

- **Scheduler:** GANTT chart visualization software for process scheduling in UNIX systems. Developed in **C++**.
 - Theme management.
 - Implementation of scheduling algorithms: Round Robin, FCFS, SJF, SRTF.
 - Full documentation.**Tools:** C++, SDL, ImGui, SDL_TTF, SDL_Image, TypeScript, Astro.
[View Project](#).
- **U-sentry:** Alert management platform for the university environment. Developed with **React**, **Expo**, **TypeScript**, **Redux**, **Supabase**, **React Native**.
 - Management of posts and notifications.
 - Mobile UI with personalized user journey and favorites.
 - Real-time updates with Supabase.[View Project](#).
- **Chair Rental:** Chair booking platform for events in Cameroon (under development).

- Cart management and product tracking.
- Admin dashboard.

Tools: React, TypeScript, Redux.

[View Project.](#)

- **Généralité Informatique:** E-commerce platform for technology products, including cameras and accessories.
 - Product display and catalog management.
 - Landing page interface and admin dashboard.

Tools: React, JavaScript, Firebase, Material UI, Sass.

[View Project.](#)

- **Woconnex:** Platform developed during the CITS 2024 hackathon on gender disparity in tech industries (under development).
 - Profile, feed, and subscription management.

Tools: React, TypeScript, Redux.

[View Project.](#)

- **Jumper:** Educational game in C++ to learn programming basics.
 - Screen, sound, and controls management.

Tools: C++, SDL.
